## **Student Query Handbook**

### **1. Welcome**

Welcome to the AI Powered Operations Assistant project. This handbook has been prepared to help

students understand the academic process, online learning environment, examination guidelines,

assignment procedures, student services, code of conduct and support facilities. Students are

advised to read this handbook carefully before beginning the semester. It serves as a reference

document throughout the academic year and provides important operational information related to

online education.

### **2. Attendance Policy**

Students are expected to maintain a minimum attendance of 75% in every course. Attendance is

recorded for each scheduled class and laboratory session. Students should regularly monitor their

attendance through the student portal. If attendance falls below the required percentage, warning

notifications may be issued. Continuous absenteeism may affect examination eligibility unless

approved by the academic department. Students unable to attend classes due to medical or

personal reasons should inform the faculty and submit supporting documents whenever required.

### **3. Assignment Submission**

Assignments are an important part of continuous assessment. Students must upload assignments

through the Learning Management System (LMS) before the deadline. Every submission should be

verified after uploading. Late submissions may receive reduced marks according to academic

regulations. Plagiarism, copied work, or AI-generated content submitted without permission may

lead to disciplinary action. Students are encouraged to cite references properly and maintain

originality in their work.

### **4. Examination Guidelines**

Students should report to the examination venue at least thirty minutes before the scheduled time

and carry a valid student ID card. Electronic devices such as mobile phones, smart watches,

programmable calculators and other unauthorized materials are not permitted. Students should

carefully read all instructions before answering the question paper. Any form of malpractice

including cheating, impersonation or communication with other candidates may result in cancellation of the examination and disciplinary proceedings.

### **5. LMS, Student Support and Resources**

The Learning Management System provides access to course materials, recorded lectures, announcements, assignments and grades. Students should check the LMS and their registered

email regularly for important updates. In case of login issues, students should use the 'Forgot

Password' option or contact technical support. The institution also provides digital library resources,

e-books, journals, counselling services, academic advising and career guidance. Students may

contact the program coordinator for academic queries or raise grievances through the official

student support portal. They are expected to maintain academic integrity, respect university

policies and use institutional resources responsibly throughout the program.
